

5-GALLON

Simple and Reliable Dispensing:

- Adjustable linkage drive allows users to set appropriate catalyst to material percentage limiting surrounding temperature concerns
- Mix of materials is thorough and repeatable once proper ratio is set.

Compact Design:

- Provides users the option to use closer to production areas, limiting the need for longer hose sets and reducing waste
- System footprint makes it ideal for smaller manufacturers with limited production space

Specifications:

- **Output Capabilities:** approximately 1 lb/min – 4 lbs/min (.45 kgs/min – 1.8 kgs/min)
- **Air Consumption:** 25–30 CFM (0.7 – 0.9 m³/min)
- **Catalyst % Range:** .75% – 2.5% by volume
- **Available Pump Ratio:** 23:1
- **Max Air Input Pressure:** 100 psi (7 bar)
